SUMMARY

To pursue a highly challenging technical career, where I can apply my knowledge, Acquire new skills and contribute constructively for the organizations growth.

WORK EXPERIENCE

Intern at HyggeX Digital Service Private Limited

- Designed and iterated responsive web pages, ensuring optimal user experience across various devices and screen sizes.
- Created and managed Redux slices for maintaining and managing the global state of complex web applications, improving data consistency and performance.
- Integrated web pages with APIs to enable dynamic content loading and interaction, enhancing the functionality and user engagement of the website.
- Developed RESTful APIs to facilitate seamless communication between the front-end and back-end systems, improving the efficiency and scalability of the web applications.

PROJECTS

NewsHub

- Developed a dynamic website using Node.js for an online news system,.
- Implemented user authentication and registration features, along with personalized dashboards for users to view news they have uploaded, enhancing user experience and engagement.
- Implemented role-based authorization and authentication to control access and permissions for uploading news in different sections, ensuring secure and organized content management.
- Fetched news from various APIs and displayed it on the website, providing users with a comprehensive and up-to-date news feed.

ChargEv

- Developed a dynamic website using React.js and Django Rest Framework, creating a seamless user interface and efficient back-end services.
- Utilized Google Maps API to locate nearby EV charging points, providing users with accurate and real-time information.
- Implemented user authentication and registration features, along with personalized dashboards, enhancing user experience and engagement.

DiagnoHealth

- Designed and developed a web-based diagnostic tool for disease assessment
- Used machine learning algorithms like SVM, Logistic Regression, and Random Forest
- Implemented intuitive user interface for symptom input and results display

SKILLS

- Front End: HTML, CSS, Tailwind, Bootstrap,ReactJS, Redux, Redux-toolkit.
- Backend: NodeJS, Django, ExpressJS,
- DATABASE: MONGODB, MYSQL.
- Languages: C, Python, Javascript,Java.
- Others: Windows, Linux, Networking, Git, AWS(EC2,S3,RDS,ECS,ESR),Docker,DockerHub.

EDUCATION

- AP Shah Institute Of Technology -2024
  Bachelor of Engineering in Computer Scinece (8.3 CGPG)
- Sheth N.K.T.T College • 2020
  Maharashtra State Board (80.3%)
- Gramin Shikshan Sanstha English High School• 2018•
  Maharashtra State Board (88.88%)

CERTIFICATIONS

- Aws Academy Cloud Foundation
- Oracle DBMS
- CISCO IT Essentials
- NDG Linux Unhatched

Other Skills

- Problem Solving
- Communication
- Collaboration
- Time management
